Chapter 7
Group Reporting VI: Complex Consolidation Issues

Copyright © 2016 by McGraw-Hill Education (Asia). All rights reserved.

1

Learning Objectives

1. Đánh giá cao tác động của quyền sở hữu gián tiếp đối với kế toán hợp nhất và vốn chủ sở hữu;
2. Chuẩn bị các điều chỉnh hợp nhất và ghi sổ kế toán vốn chủ sở hữu cho các cơ cấu nhóm nhiều tầng;
3. Đánh giá cao ý nghĩa của việc hợp nhất kinh doanh đạt được trong các giai đoạn và những thay đổi về quyền sở hữu trong công ty con;
4. Chuẩn bị các điều chỉnh hợp nhất đối với những thay đổi về quyền sở hữu trong công ty con, có và không có thay đổi về quyền kiểm soát;
5. Phân tích số tiền trong báo cáo tài chính hợp nhất trong các trường hợp phức tạp hơn;
6. Chuẩn bị các điều chỉnh hợp nhất cho việc chuyển giao tài sản trong các bối cảnh phức tạp hơn;
7. Hiểu những khác biệt tạm thời trong việc ghi nhận lợi nhuận phát sinh từ việc hợp nhất và các phương pháp giá gốc và vốn chủ sở hữu; Và
8. Đánh giá sự khác biệt cơ bản giữa báo cáo lưu chuyển tiền tệ của một đơn vị và báo cáo lưu chuyển tiền tệ hợp nhất.

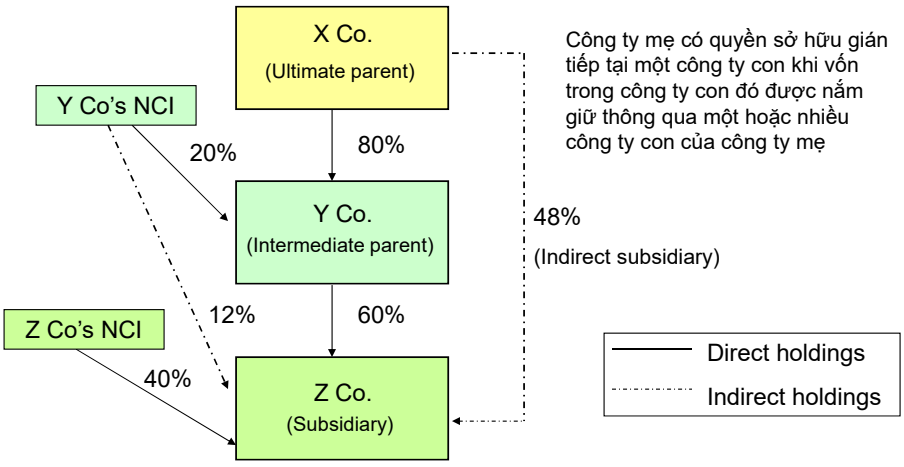

2

Content

1. Quyền sở hữu gián tiếp
2. Dual Approach to Consolidation of Indirect Non-controlling Interests in Subsidiaries
3. Indirect Holding of Associates
4. Business Combination Achieved in Stages
5. Asset Transfers in More Complex Settings
6. Impact of Consolidation and the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

3

Quyền sở hữu gián tiếp

Công ty mẹ có quyền sở hữu gián tiếp tại một công ty con khi vốn trong công ty con đó được nắm giữ thông qua một hoặc nhiều công ty con của công ty mẹ

4

Direct and Indirect NCI

	Direct NCI	Indirect NCI
Loại bỏ vốn cổ phần	✓	✗
Thanh toán cổ tức	✓	✗
Lãi/lỗ sau thuế và sau FV năm hiện tại và các khoản điều chỉnh lợi nhuận chưa thực hiện	✓	✓
Thay đổi về thu nhập giữ lại sau mua lại (RE), thu nhập toàn diện khác và những thay đổi về vốn chủ sở hữu	✓	✓ *

*Note: Những thay đổi về vốn chủ sở hữu không bao gồm vốn cổ phần. Thay đổi lợi nhuận giữ lại chỉ bắt đầu từ ngày công ty mẹ trung gian mua lại công ty con gián tiếp

5

Direct and Indirect NCI

Việc tái thực hiện lợi ích trực tiếp không kiểm soát bao gồm:

- Phần giá trị hợp lý của vốn chủ sở hữu hoặc phần tài sản thuần có thể xác định được tại ngày mua lại công ty con trực tiếp
- Phần thay đổi trong lợi nhuận giữ lại và những thay đổi khác trong vốn chủ sở hữu của công ty con trực tiếp kể từ ngày mua lại công ty con trực tiếp đến đầu kỳ báo cáo, được điều chỉnh cho các khoản thu nhập chưa thực hiện tại ngày này và phân bổ các khoản điều chỉnh giá trị hợp lý trong quá khứ
- Phần lãi/(lỗ) sau thuế điều chỉnh của công ty con trực tiếp

6

Direct and Indirect NCI

Re-enactment of indirect non-controlling interests comprise:

- Phần đầu tư ban đầu vào công ty con gián tiếp
- Phần thay đổi trong thu nhập giữ lại và những thay đổi khác trong vốn chủ sở hữu của công ty con gián tiếp kể từ ngày công ty mẹ trung gian mua lại công ty con gián tiếp đến đầu kỳ báo cáo, được điều chỉnh cho các khoản thu nhập chưa thực hiện tại ngày này và phân bổ hợp lý trong quá khứ điều chỉnh giá trị
- Phần lợi nhuận/(lỗ) sau thuế được điều chỉnh trong kỳ hiện tại của công ty con gián tiếp

7

Components of Indirect Non-Controlling Interests

Phần đầu tư ban đầu vào công ty con gián tiếp tại ngày mua	Tỷ lệ thay đổi sau khi mua lại vốn chủ sở hữu được điều chỉnh từ ngày mua lại công ty con gián tiếp đến đầu kỳ hiện tại	Phần lợi nhuận hiện tại được điều chỉnh và vốn chủ sở hữu khác của công ty con gián tiếp
(1) Tỷ trọng giá trị sổ sách của vốn chủ sở hữu	(1) Tỷ trọng của Δ Giá trị sổ sách của vốn chủ sở hữu	1) Phần lợi nhuận hiện tại và vốn chủ sở hữu khác
(2) Phần tài sản ròng có thể xác định được của FV-BV	(2) Phần khấu hao lũy kế trong quá khứ của FV-BV đối với tài sản ròng có thể xác định được	(2) Phần khấu hao hiện tại của FV-BV đối với tài sản ròng có thể xác định được
(3) LTTM ngầm	(3) Phần tổn thất lợi thế thương mại trong quá khứ	(3) Phần suy giảm lợi thế thương mại hiện tại

Trong phân tích của chúng tôi về lợi ích không kiểm soát trong một công ty con gián tiếp, để tránh tính hai lần tài sản ròng, chúng tôi phải loại bỏ khoản đầu tư vào công ty con gián tiếp (Z Co.).

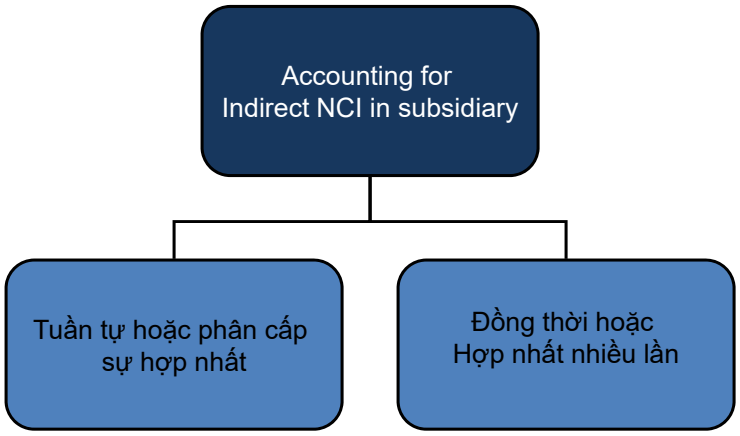

8

Content

1. Indirect Ownership Interests
2. Cách tiếp cận kép để hợp nhất các lợi ích không kiểm soát gián tiế tại các công ty con
3. Indirect Holding of Associates
4. Business Combination Achieved in Stages
5. Asset Transfers in More Complex Settings
6. Impact of Consolidation and the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

9

Cách tiếp cận kép để hợp nhất lợi ích không kiểm soát gián tiếp trong các công ty con

10

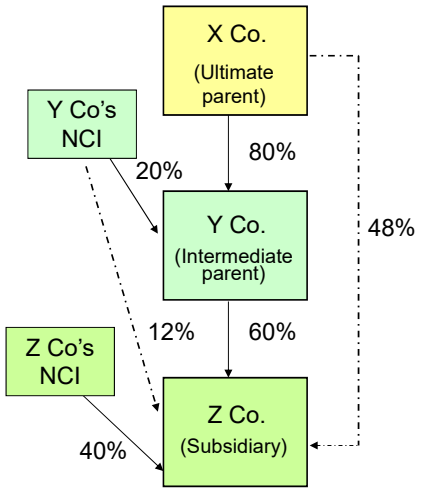

Hợp nhất tuần tự hoặc phân cấp

- Chuỗi hợp nhất phụ bắt đầu từ mức thấp nhất (cách tiếp cận từ dưới lên)

Example:

1st consolidation
- Y will consolidate Z
- Z's NCI will be allocated with 40% of Z's net profit after tax

2nd consolidation
- X will consolidate Y's sub-group
- Y's NCI will be allocated with 20% of Y sub-group net profit after tax
  - Effectively 12% of Z's net profit is allocated to Y's NCI
  - Total of 52% of Z's net profit after tax and 20% of Y's net profit after tax are allocated to NCI

11

Hợp nhất đồng thời hoặc nhiều

- Công ty mẹ cuối cùng sẽ hợp nhất đồng thời cả công ty con trực tiếp và gián tiếp trên cùng một bảng tính hợp nhất

-Bảng tính hợp nhất kết hợp các báo cáo kết quả hoạt động kinh doanh và báo cáo tình hình tài chính của công ty mẹ cuối cùng, (các) công ty mẹ trung gian và các công ty con

-Thu nhập phụ cấp thấp hơn được phân bổ ngay lập tức vào NCI gián tiếp

- Công ty mẹ trung gian được miễn hợp nhất khi công ty mẹ trung gian:
  - Là công ty con do đơn vị khác sở hữu toàn bộ hoặc một phần và chủ sở hữu không phản đối việc công ty mẹ không trình bày báo cáo hợp nhất;
  - Không có công cụ nợ và vốn được giao dịch công khai;
  - Chưa nộp hoặc không trong quá trình nộp báo cáo tài chính cho ủy ban chứng khoán hoặc tổ chức quản lý khác nhằm mục đích phát hành bất kỳ loại công cụ nào trên thị trường đại chúng; Và
  - Công ty mẹ cuối cùng lập báo cáo tài chính hợp nhất tuân thủ IFRS

12

Hợp nhất đồng thời

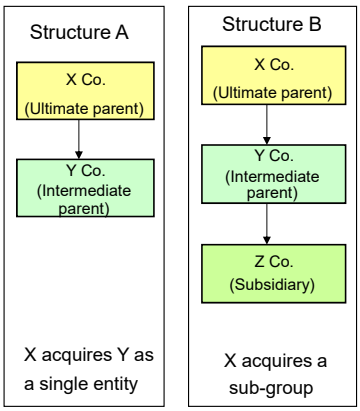

1. Loại bỏ đầu tư
   - Theo cấu trúc A

     .Khoản đầu tư vào Y sẽ bị loại trừ khỏi vốn chủ sở hữu của cổ đông Y vào ngày mua lại.

     Theo cấu trúc B (nhóm con hiện có)

     . Khoản đầu tư vào Y sẽ bị loại bỏ khỏi vốn chủ sở hữu của cổ đông hợp nhất của Y. Việc định giá hợp lý tập đoàn được thực hiện khi mua lại tập đoàn. Thiện chí được xác định vào thời điểm này

     . Khoản đầu tư vào Z sẽ bị loại bỏ khỏi vốn cổ phần, thu nhập giữ lại trước khi mua lại, thu nhập toàn diện khác và các khoản dự trữ khác của Z. Việc định giá Z hợp lý được thực hiện

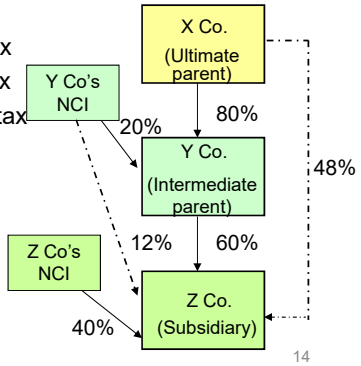

13

Hợp nhất đồng thời

2. Phân bổ lãi hoặc lỗ sau mua lại cho NCI
   - Cả NCI trực tiếp và gián tiếp đều có phần lãi hoặc lỗ sau mua lại
   - Trong cơ cấu tập đoàn, thu nhập được phân bổ cho cả NCI trực tiếp của công ty con trực tiếp và NCI gián tiếp của công ty con cấp dưới

Example:
- Direct NCI: 20% of Y Co's net profit after tax
  : 40% of Z Co's net profit after tax
- Indirect NCI: 12% of Z Co's net profit after tax

14

Simultaneous Consolidation

3. Loại bỏ thu nhập từ cổ tức so với cổ tức đã công bố

- Chỉ áp dụng cho NCI trực tiếp; cổ tức được trả cho chủ sở hữu hợp pháp

4. Khi xác định phần lợi nhuận gián tiếp của NCI của công ty con gián tiếp:

- Thu nhập cổ tức từ công ty con cấp thấp hơn được ghi nhận bởi công ty mẹ cấp trung bị loại bỏ
- Tránh ghi nhận thu nhập dưới hai hình thức (là phần lợi nhuận và thu nhập từ cổ tức)

15

Illustration 1: Simultaneous Consolidation

Acquisition details are as follows:

	A Ltd	B Ltd
Acquired by	P Ltd	A Ltd
Date of acquisition	1 Jan 20×0	1 July 20×0
Equity at acquisition		
Share capital	$30,000	$30,000
Retained earnings	$10,000	$5,000
	$40,000	$35,000
Fair value of consideration transferred	$32,000	$35,000
Percentage acquired	75%	80%
FV of NCI	$10,000	$8,000
Book value of net identifiable assets is close to FV at acquisition date		

16

Illustration 1: Simultaneous Consolidation

Income statement and partial Statement of Changes in Equity for the year ended 31 Dec 20×2:

	P Ltd	A Ltd	B Ltd
Operating profit	$20,000	$12,000	$19,000
Dividend income	6,000	4,000	-
Tax	(4,000)	(2,400)	(3,800)
Profit after tax	22,000	13,600	15,200
RE, I Jan 20×2	21,000	17,000	6,000
Dividends declared	(12,000)	(8,000)	(5,000)
RE, 31 Dec 20×2	$31,000	$22,600	$16,200

17

Illustration 1: Simultaneous Consolidation

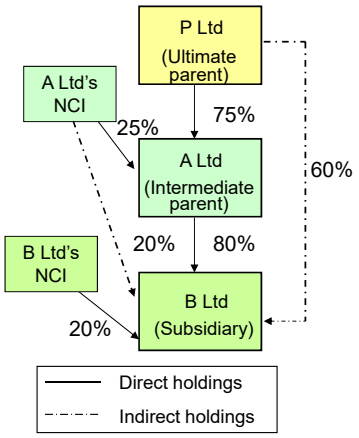

Statement of Financial Position as at 31 Dec 20×2:

	P Ltd	A Ltd	B Ltd
Share capital	$60,000	$30,000	$30,000
Retained earnings	31,000	22,600	16,200
	$91,000	$52,600	$46,200
Investment in A Ltd	$32,000		
Investment in B Ltd		$35,000	
Other non-current assets	31,000	20,000	23,000
Current assets	90,000	35,000	40,000
Current liabilities	(62,000)	(37,400)	(16,800)
	$91,000	$52,600	$46,200

18

Illustration 1: Simultaneous Consolidation

- Step 1: Identify direct and indirect NCI in the group structure

	A Ltd	B Ltd
Direct NCI	25%	20%
Indirect NCI in B (25% × 80%)	-	20%
Total NCI	25%	*40%

*Alternatively, subtract from 100%, P's effective interest in B or 60% (75% × 80%). Remaining effective interest of 40% represents both direct and indirect NCI in B

NCI gián tiếp sẽ có một phần lợi nhuận giữ lại sau khi mua lại và lợi nhuận hiện tại. NCI trực tiếp duy nhất trong việc loại bỏ vốn cổ phần và cổ tức

19

Illustration 1: Simultaneous Consolidation

- Step 2: Eliminate investment in A

CJE 1: Eliminate investment in A as at acquisition date (1 January 20×0)			
Dr	Share capital	30,000	
Dr	Retained earnings	10,000	
Dr	Goodwill*	2,000	
Cr	Investment in A		32,000
Cr	Non-controlling interests		10,000

Goodwill = FV of consideration transferred + FV of NCI – FV of net identifiable assets
= $32,000 + $10,000 – $40,000
= $2,000

20

Illustration 1: Simultaneous Consolidation

- Step 2: Eliminate investment in B

CJE 2: Eliminate investment in B as at acquisition date (1 July 20×0*)			
Dr	Share capital	30,000	
Dr	Retained earnings	5,000	
Dr	Goodwill**	8,000	
Cr	Investment in B		35,000
Cr	Non-controlling interests		8,000

*A acquired B on 1 July 20×0 after P acquired A. Hence, effectively, P acquired B on 1 July 20×0
**Goodwill = FV of consideration transferred + FV of NCI – FV of net identifiable assets
= $35,000 + $8,000 – $35,000
= $8,000

21

Illustration 1: Simultaneous Consolidation

- Step 3:Phân bổ phần lợi nhuận giữ lại sau khi mua lại của NCI
- từ ngày mua đến đầu năm

CJE 3: Allocate share post-acquisition retained earnings to direct NCI of A			
Dr	Retained earnings	1,750	
Cr	Non-controlling interests		1,750

RE at the beginning of the year	$17,000
RE at the acquisition date	10,000
Change in RE	$7,000
NCI's share (25%)	$1,750

22

Illustration 1: Simultaneous Consolidation

- Step 3: Phân bổ phần lợi nhuận giữ lại sau khi mua lại của NCI
- từ ngày mua đến đầu năm

CJE 4: Allocate post-acquisition retained earnings to direct and indirect NCI of B

Dr	Retained earnings	400	
Cr	Non-controlling interests		400

RE at the beginning of the year	6,000
RE at the acquisition date	5,000
Change in RE	1,000
NCI's share (40%)*	400

*Indirect NCI also have a share in the change of RE

23

Illustration 1: Simultaneous Consolidation

- Step 4: Allocate NCI's share of current profit after tax

CJE 5: Allocate current profit after tax to direct NCI of A

Dr	Income to non-controlling interests	2,400	
Cr	Non-controlling interests		2,400

A's profit after tax for 20×2	$13,600
Less: dividend income from B*	(4,000)
Change in RE	$9,600
NCI's share (25%)	$2,400

*Dividend income will be excluded to avoid recognizing income in two forms. Assume dividend is tax-exempt.

24

Illustration 1: Simultaneous Consolidation

- Step 4: Allocate NCI's share of current profit after tax

CJE 6: Allocate current profit after tax to direct and indirect NCI of B			
Dr	Income to non-controlling interests	6,080	
Cr	Non-controlling interests		6,080

B's profit after tax for 20×2	$15,200
Direct and indirect NCI's share (40%)	$6,080

25

Illustration 1: Simultaneous Consolidation

- Step 5: Elimination of dividends declared by A & B

CJE 7: Eliminate dividends declared by B				
Dr	Dividend income (A)	4,000		
Dr	Non-controlling interests	1,000	(20% × $5,000)	
Cr	Dividends declared (B)			5,000

CJE 8: Eliminate dividends declared by A				
Dr	Dividend income (P)	6,000		
Dr	Non-controlling interests	2,000	(25% × $8,000)	
Cr	Dividends declared (A)			8,000

- Step 6: Compile the legal entities' financial statements in one consolidation worksheet
  - Enter the consolidation adjustments above
  - Perform analytical check of non-controlling interests

26

Illustration 1: Simultaneous Consolidation

- Analytical check of NCI in A Ltd

Direct NCI in B Ltd (20%)		
Book value of equity of B Ltd	$46,200	
Share of book value of equity of B Ltd		$9,240
Fair value of NCI	8,000	
Less: Share of fair value of identifiable net assets	7,000	
Goodwill attributable to NCI		1,000
		$10,240

27

Illustration 1: Simultaneous Consolidation

- Analytical check of NCI in A Ltd

Direct NCI in A Ltd (25%)		
Book value of equity of B Ltd	$52,600	
Less: Investment in B Ltd	35,000	
	$17,600	
Share of book value of equity of A Ltd		$4,400
Fair value of NCI	10,000	
Less: Share of fair value of identifiable net assets	10,000	
Goodwill attributable to NCI		0
		$4,400

28

Illustration 1: Simultaneous Consolidation

- Analytical check of NCI in A Ltd

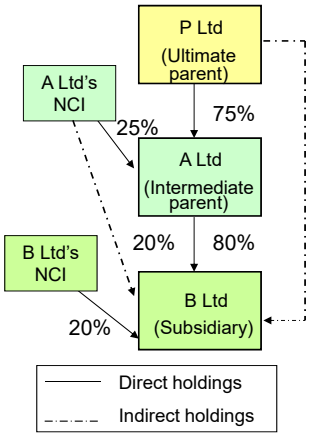

Indirect NCI in B Ltd (25% × 80%)	20%	
Book value of equity of B Ltd	$46,200	
Share of book value of equity of B Ltd		$9,240
Investment in B Ltd	35,000	
Less: Share of fair value of B's identifiable net assets	28,000	
A's goodwill in B Ltd	7,000	
Share of A's goodwill in B Ltd		1,750
		$10,990

29

Illustration 1: Simultaneous Consolidation

- Analytical check of NCI in A Ltd

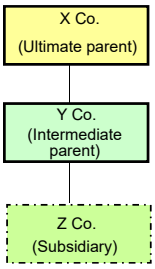

Total balance of NCI	
Direct NCI in B Ltd (20%)	$10,240
Direct NCI in A Ltd (25%)	4,400
Indirect NCI in B Ltd (25% × 80%)	10,990
	$25,630

30

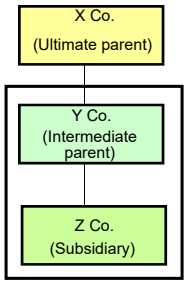

Trình tự mua lại công ty mẹ trung gian và công ty con gián tiếp

Acquired a stand-alone entity

Group structure at date of acquisition by ultimate parent (Y acquired Z after X acquired Y)

Acquired an existing sub-group of companies

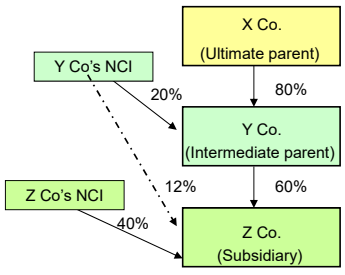

Group structure at date of acquisition by ultimate parent (Y acquired Z before X acquired Y)

31

Mua lại công ty con gián tiếp sau khi mua lại công ty mẹ trung gian

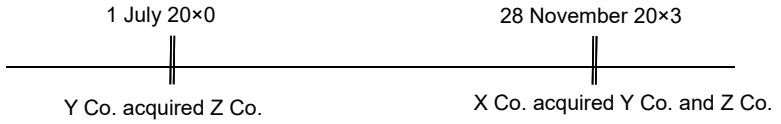

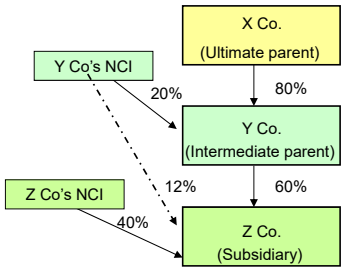

On acquisition date (28 November 20×3),

- Goodwill in Z Co. attributable to Y Co. = Investment in Z Co. – 60% × Fair value of Identifiable Net Assets of Z Co.
- Indirect NCI in Z Co. is made up of the following components:
  - 20% of the Goodwill of Z Co. recognized in Y Co.
  - 12% of the FV-BV of the Identifiable Net Assets in Z Co. on acquisition date
  - 12% of the BV in Z Co.

32

Acquisition of a Sub-group that Includes an Indirect Subsidiary

On acquisition date (28 November 20×3),

- IFRS 3 Business Combination requires the acquirer to measure the NCI at either full FV at acquisition date (Alt 1) or as a proportion of the FV of Identifiable Net Assets (Alt 2).
- NCI at sub-group will be measured at fair value at acquisition date. Goodwill attributable to NCI of intermediate parent and subsidiaries will have to be determined on the basis of the imputed FV at acquisition date.

33

Acquisition of an Existing Sub-group

1. Elimination of investment account as at date of acquisition by ultimate parent
   - Against the pre-acquisition retained earnings of each entity in the sub-group at the date of acquisition by the ultimate parent must be eliminated.
2. Goodwill on acquisition of the intermediate parent
   - = Consideration transferred + FV of NCI – FV of *consolidated* net identifiable assets of intermediate parent
   - Any goodwill and fair value adjustments that are earlier recognized in the sub-group as a result of the acquisition of the indirect subsidiary is ignored
   - Fair valuation of the sub-group is required at acquisition date
3. NCI of intermediate parent as at date of acquisition by ultimate parent have a share of:
   - Fair value of direct interests in the intermediate parent; and
   - Indirect interests in the subsidiaries held by intermediate parent
4. Subsequent to date of acquisition by ultimate parent
   - NCI of intermediate parent continues to have a share of change in RE of the indirect subsidiary
   - Other consolidation adjustments apply in the usual manner as seen in earlier chapters

34

Analytical Checks on Direct & Indirect NCI

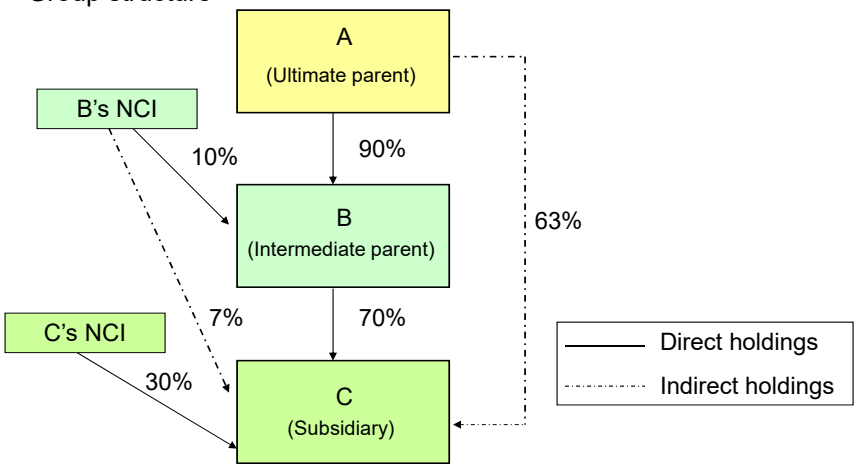

Direct NCI's balance at year-end	=	Direct NCI's share of: a) Book value of net assets of intermediate parent as a legal entity at year-end less any investment in indirect subsidiary b) Unamortized balance of fair value adjustments of intermediate parent at year-end c) Unimpaired balance of goodwill at year-end*
Indirect NCI's balance at year-end	=	Indirect NCI's share of: a) Book value of net assets of indirect subsidiary at year-end b) Unamortized balance of fair value adjustments of indirect subsidiary at year-end c) Unimpaired balance of goodwill at year-end*

*Goodwill may be combined as the fair value of NCI of the intermediate parent at acquisition date is often determined for the sub-group as a unit.

35

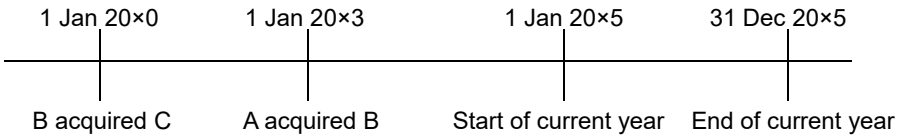

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

- Group structure

36

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

B acquired C

Percentage acquired	70%
Date of acquisition	1 Jan 20×0
Fair value of consideration transferred	$4,000,000
Fair value of NCI in C	$1,600,000
Fair value of land of C	$2,000,000
Carrying amount (book value) of land of C	$1,400,000

Note: land of C was under-valued at both dates. Land was unsold and proceeds if any are tax exempt and deferred tax liability need not be recognized.

37

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

	1 Jan 20×0	1 Jan 20×3	1 Jan 20×5
Share capital of C	$1,500,000	$1,500,000	$1,500,000
Retained earnings of C	2,000,000	5,000,000	7,000,000
Shareholders' equity of C	$3,500,000	$6,500,000	$8,500,000

Net profit of C for year ended 31 Dec 20×5	$1,000,000
Dividends declared by C during 20×5	(60,000)
Profit retained	$940,000
Retained earnings of C as at 31 Dec 20×5	$7,940,000

38

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

A acquired B

Percentage acquired	90%
Date of acquisition	1 Jan 20×3
Fair value of consideration transferred	$20,000,000
Fair value of NCI in B	$1,700,000
Fair value of direct NCI in C	$2,400,000
Fair value of land of C	$2,300,000
Carrying amount of land of C	$1,400,000

39

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

	1 Jan 20×3	1 Jan 20×5
Share capital of C	$6,000,000	$6,000,000
Retained earnings of C	5,900,000	7,200,000
Shareholders' equity of C	$11,900,000	$13,200,000

Net profit of B for year ended 31 Dec 20×5	$2,000,000
Dividends declared by B during 20×5	(200,000)
Profit retained	$1,800,000
Retained earnings of B as at 31 Dec 20×5	$9,000,000

40

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Consolidation adjustments as at 31 Dec 20×5

CJE1: Elimination of investment in B and investment in C as at 1 Jan 20×5				
Dr Share capital (B)	6,000,000			
Dr Share capital (C)	1,500,000			
Dr Retained earnings (B)	5,900,000			
Dr Retained earnings (C)	5,000,000			
Dr Land	900,000			
Dr Goodwill	8,800,000	(Note 1)		
Cr Investment in B (A)			20,000,000	
Cr Investment in C (B)			4,000,000	
Cr NCI in B			1,700,000	(Note 3)
Cr NCI in C			2,400,000	(Note 4)

41

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Note 1:

Goodwill

= FV of consideration transferred + FV of NCI in B + FV of NCI in C – FV of identifiable net assets

= $20,000,000 + $1,700,000 + $2,400,000 – $15,300,000 *(Note 2)*

= $8,800,000

Note 2:

FV of identifiable net assets

= BV of net assets of B as at 1 Jan 20×3 (after deducting B's investment in C to avoid double counting of net assets) + BV of net assets of C as at 1 Jan 20×3 + Excess of FV of land of C as at 1 Jan 20×3

= ($11,900,000 – $4,000,000) + $6,500,000 + $900,000

= $15,300,000

42

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Note 3:

NCI in B has a fair value of $1,700,000 as at 1 Jan 20×3. Fair value comprises the NCI's share of net identifiable assets and goodwill.

NCI in B and indirect NCI in C	Total	NCI's share at 10%
B's shareholders' equity or net assets at 1 Jan 20×3	$11,900,000	
Less: Investment in C	(4,000,000)	
Adjusted Net assets of B	$7,900,000	$790,000
C's book value of equity or net assets as at 1 Jan 20×3	6,500,000	
B's share (7%)	4,550,000	455,000*
FV-BV of land of C	900,000	
B's share (7%)	630,000	63,000**
Fair value of INA		1,308,000
Goodwill attributable to B's NCI (residual)		392,000
Fair value of NCI of B on 1 Jan 20×3		$1,700,000

*B's NCI's share of book value of C = 10% × 70% × $6,500,000 = $455,000

**B's NCI's share of fair value excess of land of C = 10% × 70% × $900,000 = $63,000

43

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Note 4:

Fair value of C's NCI as at 1 Jan 20×3 is $2,400,000.

	Total	NCI's share at 30%
C's shareholders' equity as at 1 Jan 20×3	$6,500,000	$1,950,000
Share of fair value of excess of land		180,000
NCI's goodwill		$270,000*
NCI in C		$2,400,000

*NCI's goodwill = FV of NCI – share of FV of net identifiable assets of C
= $2,400,000 – 30% × $6,500,000 – 30% × $900,000
= $180,000

44

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

CJE 2: Allocate B's post-acquisition retained earnings to NCI

Dr	Opening retained earnings	130,000	
Cr	Non-controlling interests		130,000

RE of B as at 1 Jan 20×5	$7,200,000
RE of B as at 1 Jan 20×3	5,900,000
Change in RE of B	$1,300,000
NCI's share (10%)	130,000

45

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

CJE 3: Allocate C's post-acquisition retained earnings to NCI

Dr	Opening retained earnings	600,000	
Cr	Non-controlling interests		600,000

RE of C as at 1 Jan 20×5	$7,000,000
RE of C as at 1 Jan 20×3	5,000,000
Change in RE of C	$2,000,000
NCI's share (30%)	600,000

Direct non-controlling interests' share of retained earnings of C on 1 January 20×3 is accounted for in CJE1

46

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

CJE 4: Allocate C's post-acquisition retained earnings to indirect NCI

Dr	Opening retained earnings	140,000	
Cr	Non-controlling interests		140,000

RE of C as at 1 Jan 20×5	$7,000,000
RE of C as at 1 Jan 20×3	5,000,000
Change in RE of C	$2,000,000
Indirect NCI in C (10% × 7%)	7%
NCI's share	140,000

This entry can be combined with CJE 3. Indirect NCI's share of change in RE of C from 1 Jan 20×0 to 1 Jan 20×3 is accounted for in the recognition of fair value of NCI in B Co. (and indirect NCI in C Co.) in CJE 1.

47

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

CJE 5: Allocate current profit after tax of C to direct & indirect NCI

Dr	Income to non-controlling interests	370,000	
Cr	Non-controlling interests		370,000

Net income of C for 20×5	$1,000,000
Total NCI's share (37%)	$370,000

CJE 6: Allocate current profit after tax of B to direct NCI

Dr	Income to non-controlling interests	195,800	
Cr	Non-controlling interests		195,800

Net income of B for 20×5	$2,000,000
Less: dividend income from C included in B's net income	(42,000)
Adjusted net income of B for 20×5	$1,958,000
Direct NCI's share	$195,800

48

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

CJE 7: Eliminate dividends declared by C		
Dr Dividend income (B)	42,000	
Dr Non-controlling interests	18,000	
Cr Dividends declared by C		60,000

CJE 8: Eliminate dividends declared by B		
Dr Dividend income (A)	180,000	
Dr Non-controlling interests	20,000	
Cr Dividends declared by B		200,000

49

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

	Total NCI	Direct NCI in B*	Direct NCI in C**	Indirect NCI in C**
CJE 1: B's NCI and C's NCI at date of acquisition of B	$3,100,000	1,490,000	2,400,000	210,000
CJE 2: Allocation of B's post acquisition RE to direct NCI of B	130,000	130,000		
CJE 3: Allocation of C's post acquisition RE to direct NCI of C	600,000		600,000	
CJE 4: Allocation of C's post acquisition RE to indirect NCI of C	140,000			140,000
CJE 5: Allocation of current profit of C	370,000		300,000	70,000
CJE 6: Allocation of current profit of B	195,800	195,800		
CJE 7: Elimination of dividends from C	(18,000)		(18,000)	
CJE 8: Elimination of dividends from C	(20,000)	(20,000)		
	$5,497,800	$1,795,800	$3,282,000	$420,000

*Including indirect NCI in B Co.
**Separation is optional: reconciliation is done for total NCI in C
Total NCI in C = $1,795,800 + $420,000 = $2,215,800

50

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Analytical Check on NCI	Total	NCI's Share of B at 10%
B's Net assets at 31 Dec 20×5	$15,000,000	
Less: Investment in C	(4,000,000)	
	$11,000,000	$1,100,000
C's book value of equity or net assets at 31 Dec 20×5	9,440,000	
B's share (7%)	6,608,000	660,800
FV-BV of land of C	900,000	
B's share (7%)	630,000	63,000
Goodwill attributable to B's NCI (CJE 1)		392,000
NCI of B and Indirect NCI of C on 31 Dec 20×5		$2,215,800

51

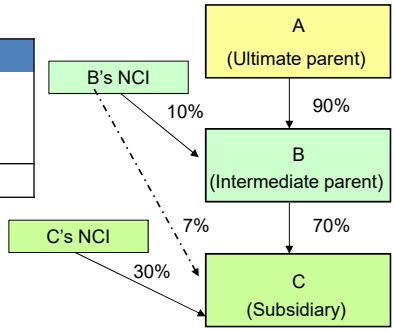

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Analytical Check on NCI	Total	Direct NCI's share of C at 30%
C's book value of equity or net assets at 31 Dec 20×5	$9,440,000	$2,832,000
FV-BV of land of C	900,000	270,000
Goodwill attributable to B's NCI (CJE 1)		180,000
Direct NCI of C on 31 Dec 20×5		$3,282,000

52

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Analytical Check on NCI	
Direct NCI of B and Indirect NCI in C Ltd	$2,215,800
Direct NCI in C Ltd (30%)	3,282,000
Total NCI	$5,497,800

A check on indirect NCI in a multi-tier hierarchy is more complex. By virtue of their interest through an intermediate parent, we need to remove the investment included on the intermediate parent's statement of financial position to avoid double counting of the net assets of the indirect subsidiary.

53

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Listing Approach:

A's RE as at 31 Dec 20×5	$12,000,000
B's RE as at 31 Dec 20×5	9,000,000
C's RE as at 31 Dec 20×5	7,940,000
CJE 1 Elimination of pre-acquisition RE of B	(5,900,000)
CJE 1 Elimination of pre-acquisition RE of C	(5,000,000)
CJE 2 Allocation of post acquisition RE of B to B's NCI	(130,000)
CJE 3 Allocation of post acquisition RE of C to direct NCI	(600,000)
CJE 4 Allocation of post acquisition RE of C to indirect NCI	(140,000)
CJE 5 Allocation of current profit to total NCI of C	(370,000)
CJE 6 Allocation of current profits to B's NCI	(195,800)
CJE 7 Elimination of dividends from C	18,000
CJE 8 Elimination of dividends from B	20,000
Consolidated RE as at 31 Dec 20×5	**$16,642,200**

54

Illustration 2: Simultaneous Consolidation of an Existing Sub-group of Companies

Analytical check of consolidated RE as at 31 Dec 20×5:

A's RE as at 31 Dec 20×5	$12,000,000
A's share of B's post acquisition RE (Note 1)	2,790,000
A's share of C's post acquisition RE (Note 2)	1,852,200
Consolidated RE as at 31 Dec 20×5	**$16,642,200**

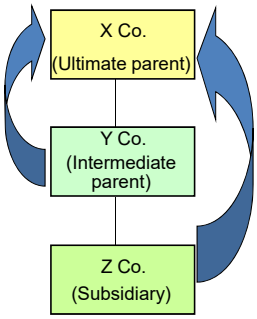

Note 1: 90% × ($9,000,000 – $5,900,000)
Note 2: 90% × 70% × ($7,940,000 – $5,000,000)

55

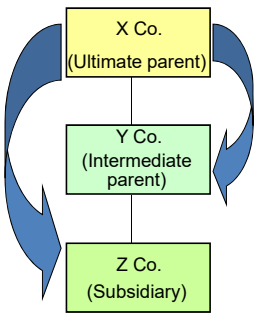

Impact of Adjustments of Unrealized Profit on Indirect NCI

- Unrealized profit included in the profit or retained earnings of the selling company
  - Will be adjusted out, and
  - Allocated to both direct and indirect NCI

Upstream sale

Downstream sale

56

Impact of Fair Value Adjustments on Indirect NCI

- Indirect NCI have a share of the net assets and the fair value adjustments of an indirect subsidiary at the date of acquisition
- During the post-acquisition period, both NCI and intermediate parent have to bear a share of the amortization of the fair value adjustments
  - Indirect NCI have a share of the intermediate parent's profit or losses
  - Indirect NCI also bears a share of the amortization of fair value adjustments that are borne by the intermediate parent
  - Effects of past cumulative and present amortization of fair value adjustments will be allocated to direct and indirect NCI

57

Illustration 3: Simultaneous Consolidation with Fair Value Adjustments

	Acquired Company	
	S Co.	B Co.
Acquirer	P Co.	S Co.
Date of acquisition	1 Jan 20×1	1 July 20×1
Percentage acquired	90%	60%
Direct NCI	10%	40%
FV of NCI	250,000	80,000
Cost of consideration transferred	2,500,000	300,000

58

Illustration 3: Simultaneous Consolidation with Fair Value Adjustments

Statement of Financial Position as at acquisition

	S Co. Book value	S Co. Fair Value	B Co. Book value	B Co. Fair Value
Intangible assets		250,000		
Inventory	400,000	450,000	60,000	55,000
Other net assets	900,000	900,000	100,000	100,000
Net assets	1,300,000	1,600,000	160,000	155,000
Share capital	1,000,000		50,000	
Retained earnings	300,000		110,000	
Equity	1,300,000		160,000	

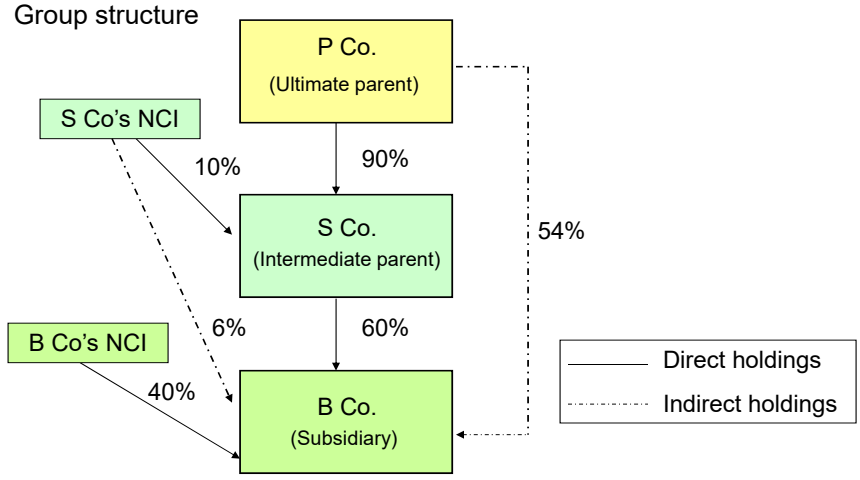

Additional information:

- Intangible assets have an estimated useful life of five years from date of acquisition by P.
- Inventory at acquisition date was sold off in 20×2
- Tax rate 20%

67

Illustration 4: Indirect Holding of an Associate Held through a Subsidiary

Q1: Prepare the consolidation and equity accounting entries for 20×5

CJE1: Elimination of investment in S				
Dr Share capital (S)	5,000,000			
Dr Retained earnings (S)	3,000,000			
Dr Goodwill	2,900,000	(Note 1)		
Cr Investment in S			6,500,000	
Cr NCI			4,400,000	(Note 2)

Note 1:
Goodwill
= FV of consideration transferred + FV of NCI – FV of identifiable net assets
= $6,500,000 + $4,400,000 – $8,300,000
= $2,900,000

Note 2: Fair value of NCI as at acquisition date is comprised of:
1) Share of fair value of net identifiable assets (40% × $8,000,000 = $3,200,000); and
2) Share of goodwill ($4,400,000 – $3,200,000 = $1,200,000)

68

Illustration 4: Indirect Holding of an Associate Held through a Subsidiary

CJE 2: Allocation of post-acquisition retained earnings of S to NCI

Dr Retained earnings (S)	600,000	
Cr NCI		600,000

Retained earnings at 1 Jan 20×5	$4,500,000
Retained earnings at acquisition	(3,000,000)
Change in retained earnings	$1,500,000
NCI's share (40%)	600,000

CJE 3: Elimination of dividend income received from S

Dr Dividend income	72,000	($120,000 × 60%)
Dr NCI	48,000	($120,000 × 40%)
Cr Dividends declared (S)		120,000

69

Illustration 4: Indirect Holding of an Associate Held through a Subsidiary

CJE 4: Equity accounting of profits by S

Dr Investment in A	60,000	($200,000 × 30%)
Cr Dividends declared (S)		60,000

CJE 5: Allocation of current profit after tax to NCI

Dr Income to NCI	339,200	
Cr NCI		339,200

Net profit after tax of S	$800,000
Less: dividend income from A ($40,000 × 30%)	(12,000)
Add: share of profit after tax of A	(60,000)
Net profit after tax of S excluding dividend from A	$848,000
NCI's share (40%)	$339,200

70

Illustration 4: Indirect Holding of an Associate Held through a Subsidiary

CJE 6: Reclassification of dividend from A			
Dr Dividend income (S)	12,000	($40,000 × 30%)	
Cr Investment in A			12,000

CJE 7: Reclassification of dividend from A			
Dr Investment in A	30,000		
Cr Retained earnings		18,000	($30,000 × 60%)
Cr NCI		12,000	($30,000 × 40%)

Retained earnings at 1 Jan 20×5	$300,000
Retained earnings at acquisition	(200,000)
Change in retained earnings	$100,000
S's share (30%)	$30,000

71

Content

1. Indirect Ownership Interests
2. Dual Approach to Consolidation of Indirect Non-controlling Interests in Subsidiaries
3. Indirect Holding of Associates
4. Business Combination Achieved in Stages
5. Asset Transfers in More Complex Settings
6. Impact of Consolidation and the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

72

Business Combination Achieved in Stages

- Achieving control through incremental purchases
- Determine fair value of goodwill at acquisition date when control is obtained
- Measurement procedures:
  - Previously-held interest must be remeasured to fair value at acquisition date when control is achieved
  - Remeasurement gain or loss will be taken to income statement
    - Rationale for the remeasurement is that a significant economic event has occurred, and there is a fundamental change in relationship between investor and investee.
  - If the acquirer has previously recognized gain in the equity for available-for-sale securities
    - IFRS 3:42 requires the cumulative fair value changes that are recognized directly in other comprehensive income will be accounted for in a manner as if the acquirer had disposed of the previously held equity interests.
    - Under IFRS 9, the fair value change of an equity investment that is classified as fair value through other comprehensive income would not be reclassified to income statement on disposal.

73

Goodwill in a Business Combination Achieved in Stages

If business combination is achieved in stages, the goodwill calculation will include a new element, the fair value of previously held interest as follows:

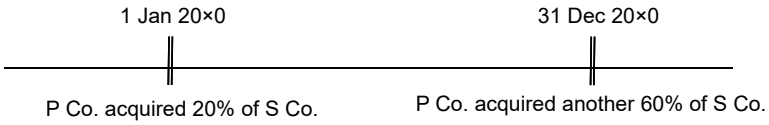

Goodwill = (Fair value of consideration transferred + Fair value of non-controlling interests + Acquisition date fair value of the acquirer's previously held equity interest in the acquiree) - Fair value of net identifiable assets of the acquiree at the acquisition date

74

Illustration 5: Business Combination Achieved in Stages

P acquired S in two successive purchases:

Date	Acquisition cost paid for incremental investment	Fair value of S as an entity	Percentage acquired in incremental investment	Cumulative percentage held by P
1 Jan 20×0	$3,000,000	$15,000,000	20%	20%
31 Dec 20×0	$12,000,000	$20,000,000	60%	80%

75

Illustration 5: Business Combination Achieved in Stages

NCI are measured at fair value and are deemed to have a proportionate interest in the fair value of S as an entity.

	1 Jan 20×0 Book Value	1 Jan 20×0 Fair Value	31 Dec 20×0 Book Value	31 Dec 20×0 Fair Value
Intangible assets	$0	$1,800,000	$0	$1,600,000
Inventory	1,000,000	1,200,000	2,000,000	2,400,000
Other net assets	9,000,000	9,000,000	12,000,000	12,000,000
Net identifiable assets	$10,000,000	$12,000,000	$14,000,000	$16,000,000
Share capital	$4,000,000		$4,000,000	
Retained earnings	6,000,000		10,000,000	
	$10,000,000		$14,000,000	

Intangible assets had a remaining useful life of 6 years from 1 January 20×0.

Inventories were sold within 3 months from the acquisition date.

76

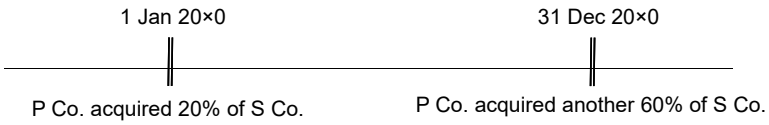

Illustration 5: Business Combination Achieved in Stages

Income statement of S Co. for the year 20×0

	2x0
Net profit before tax	$6,250,000
Tax expense	(1,250,000)
Net profit after tax	5,000,000
Dividends declared	(1,000,000)
Profit retained	4,000,000

77

Illustration 5: Business Combination Achieved in Stages

Since P had 20% equity interest in S during 20×0 and hence P had to equity account S's profit for the year ended 31 Dec 20×0.

EA1: Share of profit for the year ended 31 December 20×0		
Dr Investment in S	920,000	
Cr Share of profit		920,000

Profit after tax of S	$5,000,000
Less: Amortization of intangible assets after-tax	(240,000)
Less: Cost of sales from undervalued inventory, after-tax	(160,000)
Adjusted profit after tax	$4,600,000
Share of S's profit after tax at 20%	$920,000

78

Illustration 5: Business Combination Achieved in Stages

EA2: Reclassification of dividend income received during 20×0		
Dr Dividend income	200,000	
Cr Investment in S		200,000

EA3: Recognition of remeasurement gain in consolidated financial statements		
Dr Investment in S	280,000	
Cr Gain on remeasurement		280,000

79

Illustration 5: Business Combination Achieved in Stages

With the obtaining of control on 31 Dec 20×0, the investment balance has to be eliminated and goodwill recognized on acquisition date.

CJE1: Elimination of investment and recognition of goodwill				
Dr Share capital	4,000,000			
Dr Retained earnings	10,000,000			
Dr Goodwill	4,400,000	(Note 3)		
Dr Intangible assets	1,600,000			
Dr Inventory	400,000			
Cr Deferred tax liability			400,000	(Note 1)
Cr Investment in S			16,000,000	
Cr NCI			4,000,000	(Note 2)

80

Illustration 5: Business Combination Achieved in Stages

Note 1:

Deferred tax liability

= 20% × Fair value adjustments of $2,000,000

= $400,000

Note 2:

NCI have to be recognized on 31 December 20×0. The NCI has a proportionate interest in the fair value of S as an entity.

NCI

= 20% × Fair value of S as an entity

= 20% × $20,000,000

= $4,000,000

81

Illustration 5: Business Combination Achieved in Stages

Note 3:

Fair value of net identifiable assets

= $16,000,000 – Deferred tax liability of $400,000

= $15,600,000

Goodwill

= (Fair value of consideration transferred at acquisition date + Fair value of NCI + Fair value of acquirer's previously held equity interest in the acquiree at acquisition date) – fair value of net identifiable assets

= ($12,000,000 + $4,000,000 + $4,000,000) – $15,600,000

= $4,400,000

82

Loss of Control

- Loss of control of a subsidiary is a significant economic event and requires the investor to measure the retained investment at fair value

Example

- Investor decreases its ownership interests from 70% to 20% by selling 50% of its ownership interests
  - In substance, the investor is selling 70% and buying 20%
  - Income statement effect: 70% comprising the gain or loss from the actual sale of 50% and a “re-measurement” gain or loss from the retained 20% interests
  - Same principle applies in the case when control is obtained

83

Loss of Control

- Determine the following amounts at the date when control is lost:
  - Derecognize the assets and liabilities of the subsidiary including goodwill and unamortized balance of fair value adjustments.
  - Derecognize the carrying amount of any non-controlling interests.
  - Recognize the fair value of consideration received for the sale of the ownership interests and the gain or loss on sale.
  - Recognize any distribution of shares.
  - Remeasure any retained interests at fair value and recognize the gain or loss on remeasurement.

84

Illustration 6.1: Loss of Control

- P Co. decreases ownership on 1 January 20×0 from 90% to 30% by reducing investment from $18 million to $6 million.
- Proceeds = $9 m.
- Fair value of retained investment = $4.5 m.
- P Co's share of post-acquisition profit of subsidiary = $2 m.

	Impact on consolidated financial statements at 1 Jan 20×0
Investment	$4.5 million
Goodwill	Nil (derecognized)
Re-measurement loss (rounded)	($2.2 million) ($4.5 m – ($6 m + (1/3 × $2 m)))
Loss on sale (rounded)	($4.3 million) ($9 m – ($12 m + 2/3 × $2 m))
Equity	Nil (derecognized)

85

Illustration 6.1: Loss of Control

Consolidation adjustment in the year when control is lost

Dr Loss on sale	1,300,000	(1)	
Dr Re-measurement loss	2,200,000	(3)	
Cr Investment			1,500,000 (2)
Cr Opening retained earnings			2,000,000 (4)

	Separate FS	Consolidated FS	Consolidation adjustments
Proceeds	9,000,000	9,000,000	
Carrying amount	(12,000,000)	(12m + (60/90 * 2m)) = $13.3 m	
Loss on sale (60%)	(3,000,000)	(4,300,000)	1,300,000 (1)
Retained investment (30%)	6,000,000	4,500,000	1,500,000 (2)

(3) Re-measurement loss is the loss in carrying amount of $1.5 million plus the foregoing of the opening retained earnings (30/90 × 2 m) on the assumed sale of the retained investment
(4) It is necessary to reinstate the opening retained earnings because the investment is no longer a subsidiary at the end of the year and would not appear in the consolidation worksheet

86

Illustration 6.1: Loss of Control

- In the subsequent year (20×1), the impact on retained earnings is $1.5 million.

Dr Opening retained earnings	1,500,000	
Cr Investment		1,500,000

- If the subsidiary had other comprehensive income, a similar entry must also be re-enacted to recognize P's share of the subsidiary's revaluation reserves at the date when control was lost

87

Illustration 6.1: Loss of Control

- If control was lost during the year, we need to consolidate the subsidiary up to the date when control was lost.
- If change in ownership was 1 July 20×0 and the post acquisition profit is as follows:

From beginning of the year till 1 July 20×0		
Share of post acquisition retained earnings as at 1 Jan 20×0	$1,200,000	
Share of post acquisition revaluation reserves as at 1 Jan 20×0	$350,000	
Share of net profit for first half ended 30 June 20×0	$450,000	(Note 1)

88

Illustration 6.1: Loss of Control

Note 1:

Sales	$2,000,000
Less: Cost of Sales	$1,200,000
Gross Profit	$800,000
Less: Expenses (including tax)	$300,000
Net Profit after Tax	$500,000
Income attributable to NCI (10%)	$50,000
Profit retained	$450,000

89

Illustration 6.1: Loss of Control

Consolidation adjustment as follows:

Dr Loss on sale (PL)	1,300,000		
Dr Remeasurement loss (PL)	2,200,000		
Cr Investment		1,500,000	
Cr Opening retained earnings		1,200,000	
Cr Opening revaluation reserves		350,000	
Cr Retained earnings		450,000	(Note 2)

Note 2:

- It is insufficient to show a single line entry in retained earnings, and the investor has to consolidate on a line-by-line basis, for the period when it has control.
- The net effect of the line-by-line consolidation is to increase retained earnings by $450,000 up to the date when control is lost.

90

Illustration 6.2: Gain of Control

- P Co. increases ownership from 30% to 80% on 1 Jan 20×10 by increasing investment from $2 million to $17 million.
- Fair value of previously acquired investment = $6 m.
- Investment in associate (equity-accounted) as at 31 Dec 20×9 = $3.5 m.
- Fair value of identifiable net assets on 1 Jan 20×10 = $20 m.
- Share capital = $10 m; Pre-acquisition retained earnings = $6 million; Unrecognized intangible asset = $5 m; Tax rate = 20%
- Fair value of NCI on 1 Jan 20×10 = $4 m.

	Impact on consolidated financial statements at 1 Jan 20×10
Investment	Nil
Goodwill	$5 million (($15 m + $6 m + $4 m) – $20 m)
Re-measurement gain	$2.5 million ($6 m – $3.5 m)
Non-controlling interest	$4 million

91

Illustration 6.2: Gain of Control

- Re-enactment of equity accounting of post-acquisition retained earnings as at 1 Jan 20×10

Dr Investment in Associate	1,500,000	
Cr Opening retained earnings		1,500,000

Investment in Associate, equity method	$3,500,000
Investment in Associate, initial cost	2,000,000
Share of post acquisition retained earnings	$1,500,000

Re-measure previous interests of 30%		
Dr Investment in subsidiary	2,500,000	
Cr Re-measurement gain		2,500,000

92

Illustration 6.2: Gain of Control

Recognize goodwill as of acquisition date		
Dr Goodwill	5,000,000	
Dr Share capital	10,000,000	
Dr Retained earnings	6,000,000	
Dr Intangible asset	5,000,000	
Cr Investment		21,000,000
Cr Deferred tax liability		4,000,000
Cr Non-controlling interests		1,000,000

- Investment in subsidiary of @21 million comprises of fair value of consideration transferred to obtain control ($15 million) and the fair value of previously held interest ($6 million).
- Goodwill of $5 million is subsequently determined with reference to fair values at acquisition date and is not a layering of the results of different cost measures

93

Changes in Ownership Interests without Change in Control or Significant Influence

1. No change in control

- Transaction between the control and non-controlling interests and a re-balancing of their ownership interests
  - Purely equity transactions
- Investor required to recognize the gain or loss on sale or purchase directly in equity
  - New goodwill or fair value adjustments are recognized in equity

2. No change in significant influence

  - No special accounting requirements apply

94

Illustration 7.1: No Loss or Gain of Control

- P Co. acquired 90% of S Co. on 1 Jan 20×8 for $18 m.
- Fair value of identifiable net assets (after tax) on 1 Jan 20×8 is $10 m.
- FV of NCI on 1 Jan 20×8 is $1 m.
- P Co. increases ownership from 90% to 95% on 1 January 20×10 by increasing investment from $18 m to $20 m.
- Fair value of identifiable net assets (after tax) on 1 Jan 20×10 is $15 m.
- Fair value of NCI on 1 Jan 20×10 is $3 m. Balance of NCI on 31 December 20×9 is $3 m. Assume NCI is recognized at full fair value.

	Impact on consolidated financial statements at 1 Jan 20×10
Investment	Zero (eliminated)
Goodwill	$9 million ($18 m + $1 m – $10 m)
Non-controlling interest	$1.5 million (5%/10% of $3 m)
Equity (loss on purchase)	$0.5 million ($2 m – $1.5m)

95

Illustration 7.1: No Loss or Gain of Control

Consolidation adjustment

Dr Loss on purchase (equity)	500,000	
Dr NCI	1,500,000	
Cr Investment		2,000,000

Loss on purchase
= Consideration paid for 5% – Carrying amount of 5% of NCI
= $2 million – $1.5 million
= $0.5 million

The loss on purchase may be taken to capital reserve.

96

Illustration 7.2: No Loss or Gain of Control

- P Co. acquired 90% of S Co. on 1 Jan 20×8 for $18 m.
- Fair value of identifiable net assets (after tax) on 1 Jan 20×8 is $10 m.
- FV of NCI on 1 Jan 20×8 is $1 m.
- P Co. decreased ownership from 90% to 60% on 1 January 20×10 and the proceeds were $15 m.
- P Co's share of subsidiary's equity on 31 Dec 20×9 was $27 m.

	Impact on consolidated financial statements at 1 Jan 20×10
Investment	Zero (eliminated)
Goodwill	$9 million* ($18 m + $1 m – $10 m)
Income (Gain on sale)	Nil
Non-controlling interest	Increased by $9 million** (30%/90% × $27 m)
Equity (Gain on sale)	$6 million ($15 m – $9 m)

*Total goodwill does not change after the divestment of 30% by P Co.

**Adjustment for the change in relative interest

97

Illustration 7.2: No Loss or Gain of Control

Consolidation adjustment

CJE1: Eliminate investment as of acquisition date		
Dr Goodwill	9,000,000	
Dr Share capital	5,000,000	
Dr Retained earnings	4,000,000	
Dr Intangible asset	1,250,000	
Cr NCI		1,000,000
Cr Investment		18,000,000
Cr Deferred tax liability		250,000

98

Illustration 7.2: No Loss or Gain of Control

Consolidation adjustment

CJE2: Adjustment as at date of sale		
Dr Investment	6,000,000	
Dr Gain on sale (PL)	9,000,000	
Cr Equity (Gain on sale)		6,000,000
Cr NCI		9,000,000

The gain on sale (equity) may be taken to capital reserve.

4. Business Combination Achieved in Stages
5. Asset Transfers in More Complex Settings
6. Impact of Consolidation and the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

100

Asset Transfers in More Complex Settings

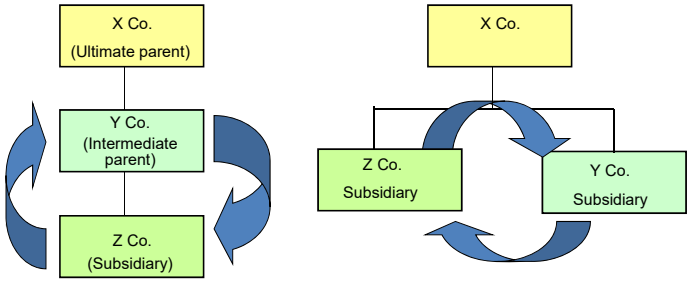

1. Asset transfers between parent and indirect subsidiaries
   - Downstream transfers
     - Adjustments made for the unrealized profit and tax effects included in the parent's profit
     - No adjustments required for NCI
   - Upstream Transfers
     - Unrealized profit remains in indirect subsidiary – adjustment required
     - Unrealized profit adjustments will affect both direct & indirect NCI

101

Asset Transfers in More Complex Settings

2. Asset transfers between fellow subsidiaries
   - Lateral or horizontal transfers
   - NCI in the transferor bear a proportion of unrealized profit adjustments
   - NCI of the buying subsidiary are not affected

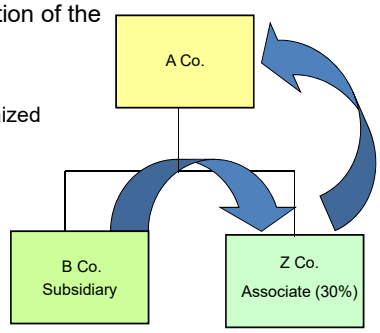

102

Asset Transfers in More Complex Settings

3. Asset transfers between a subsidiary and an associate

- If a group company sells to or buys from an associate
  - The group can only recognize the proportion of the unrelated interest share
  - Example 1: If A sells to or buys from Z
    - 70% of the unrealized profit will be recognized
  - Example 2: If B sells to Z
    - B's NCI will share a proportion of the unrealized profit
  - Example 3: If Z sells to B
    - B's NCI will not be affected

6. Impact of Consolidation, the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

104

Disposal of Subsidiaries

At group level	In separate financial statements		
Consolidation or Equity Accounting	Cost	FV (IFRS 9)	Equity Accounting
Profit/loss on sale = Proceeds – (Original cost of investment + Post-acquisition profits)	Profit/loss on sale = Sale proceeds – Original cost of investment	Profit/loss on sale = Sale proceeds – Carrying amount of investment (FV)	Profit/loss on sale = Proceeds – (Original cost of investment + Post-acquisition profits)

Equity accounting has the effect of aligning the company's carrying amount of the investment with the group's carrying amount. As such the profit on sale under equity accounting is the same as that under consolidation.

3. Indirect Holding of Associates
4. Business Combination Achieved in Stages
5. Asset Transfers in More Complex Settings
6. Impact of Consolidation and the Cost and Equity Methods on Profit upon the Disposal of Subsidiaries
7. Overview of Consolidated Cash Flow Statements

106

Cash flow Statements

- Consolidated cash flow statements follows the same procedures as a standalone entity's cash flow
- Features:
  - Depreciation and amortization of FV adjustments are adjusted back to the consolidated net profits
  - No further adjustments for unrealized profits from intragroup transfers
  - NCI's share of profit is added back (non-cash item)
  - Payments to and from NCI are disclosed under financing activities
- Consolidated cash flow statements involving a foreign subsidiary would require the application of special consideration:
  - Cash flow from operations, investing and financing activities of a foreign subsidiary should be translated at the actual rates on the dates of the cash flows.
  - It would be incorrect to translate the working capital balances at the closing rate at the respective year ends.

107

Conclusion

- Simultaneous consolidation is applied by a parent to account for indirect ownership interests in a subsidiary
  - Investment account is eliminated against the direct subsidiary's consolidated equity as at the date of acquisition
  - Post-acquisition profits or losses of subsidiaries are allocated to both direct and indirect non-controlling interests (NCI)
  - Elimination of dividend income only applies to direct NCI
  - Dividend income from lower-tier subsidiary recorded by intermediate parent is removed
- For business combination achieved in stages:
  - Previously-held interest will be remeasured to fair value at acquisition date when control is achieved
